

EECS Research Students Symposium - 2019

Indian Institute of Science, Bangalore

Faculty Hall, IISc; April 12-13, 2019

<https://eecs.iisc.ac.in/EECS2019/>

Call for Participation

The EECS Division (comprising the Departments of CSA, ECE, EE, and ESE), the Dept. of Computational and Data Sciences (CDS) and the Robert Bosch Centre for Cyber Physical Systems (RBCCPS) are pleased to announce "EECS Research Students Symposium 2018", the ninth in the series of annual symposiums. The aim of the symposium is to provide a forum for senior research students to showcase their work and to foster interactive collaborations among students, faculty, and researchers from academia, industry, and Govt. research labs.

The event will showcase the ongoing research and innovation work at these five departments and center through poster presentations by final year Ph.D students of CDS, CSA, ECE, EE, ESE and RBCCPS. The highlights include invited talks by research and leaders and talks by young faculty members of the departments. The second day of the event will be *Technology Day* and will feature talks by industry leaders, presentations by startups, and an alumni event.

Areas and Themes

AI & Machine Learning; Data Science; Communication and Signal Processing; Networks; Computer Systems and Software; Computational Science; Theoretical Computer Science; Electronic Design; Image and Video processing; Cyber-physical Systems; Power Electronics, Power Systems and High Voltage Engineering

Registration for the Symposium

The EECS Symposium organizing committee welcomes faculty members and students from engineering colleges, researchers at research labs, and industry professionals. Those desirous of participation must apply for the event by filling up the form provided in the website. After registration, the prospective participants are welcome to join the symposium. Registration is free.
