

### **Instructions for taking the test**

1. Only C programming basics will be asked in the test.
2. The test link to be used is the second one sent on April 13th (the previous link will not work). This new link will not have any expiry date.
3. The test duration will be 1 hour only.
4. The test will have four modules (Aptitude, Maths, Programming, Algorithms)
5. All questions will be objective multiple choice type questions.
6. Candidates must be in the field of the webcam during the entire duration of the test.
7. Any network or power outage of short nature, the candidate can rejoin the test back and complete the test. The system will only use the time spent on the website.
8. The continuous feed of webcam will be monitored throughout the test. The candidates are expected to maintain highest levels of academic integrity. Any evidence of malpractice will result in immediate disbaring of the candidate's application. The candidate's application to other programs in IISc as well as any future applications will also be adversely affected by indulging in malicious activities.
9. If any notes or calculations are done using pen and paper, all these actions should strictly be within the field of webcam view only.
10. The exam can be started only between (9:00 and 9:30AM) only. Once the test is started, the candidate will get a maximum time of 1 hour to complete the test. After 9:30AM no candidate, would be allowed to start the test.
